

HOME & HOSPITAL INFORMATION FOR PARENTS AND STUDENTS

When the referral from the school is signed by the health care provider and submitted to the school, a meeting will then be scheduled with appropriate school personnel. The following guidelines should be followed:

1. A parent or other adult (21 or older) must be present during instruction. Home/Hospital teachers are not permitted to teach unattended students. Students who fail to meet scheduled appointments are in danger of losing eligibility for inclusion in the program.
2. The parent is responsible to provide a suitable teaching and learning environment.
3. Home/Hospital status cannot guarantee passing grades or class credit unless they are earned. Student progress and achievement will be evaluated by the Home/Hospital teacher for the period of time the student is enrolled in the Home/Hospital program.
4. Final Home/Hospital grade assessments will be given to the regular teacher to be included with their class grades or to the school registrar to be posted on their transcript.
5. Student returns as determined by the educational team with input from the doctor and parent. Home & Hospital teacher will notify the school concerning the student.
6. Parents are responsible to fill out the papers at the health care provider's office for release of information under HIPAA.
